

# Bendomino™

**CONTENTS:** 28 Bendominoes

### ONE TWIST OF STRATEGY, TWO TWISTS OF FUN !

Bendominoes play just like regular dominoes but their innovative curved, design gives you much more control over the game. Full of challenges, Bendomino offers passionate games in which strategy, luck and good times are always combined. a great game for all generations!

### OBJECT OF THE GAME

Be the first to get rid of bendominoes.

### PREPARATION OF THE GAME

BENDOMINOES are played in rounds. At the beginning of each round, place the 28 BENDOMINOES face down and mix them.

**2 players:** each player takes 7 Bendominoes.

**3 players:** each player takes 6 Bendominoes.

**4 players:** each player takes 5 Bendominoes.

Stand the Bendominoes on their edges facing you so that other players cannot see the dots. The remaining pieces represent the stock.

### PLAYING THE GAME

The player with the highest BENDOMINO double starts the game by placing the piece on the center of the table. If no double was drawn, the highest BENDOMINO number should be played. (Example: 6/5). Taking turns in a clockwise direction, each player tries to match a BENDOMINO by number to either end of the BENDOMINO chain. To be accepted the new piece needs to match but also has to fit!

#### Example ① - Open game Position:

The new Bendomino only needs to have a matching number, since it can be played 2 ways (to the right or left)

#### Example ② - Closed game Position:

The new Bendomino needs to have a matching number and

needs to turn in the proper direction. In this example, only a Bendomino turning to the right can be played.

### DRAW:

If players do not have a BENDOMINO that can be played, they must draw one piece from the stock. If the piece they draw can be played, they can immediately play it. Blocked Positions. Either end of the BENDOMINO game can be blocked when :

A- No matching numbers are available.

B- No matching pieces can fit,

C- One end of the game is trapped in a dead end,

D- Both ends connect (rare).

### END OF A ROUND

• A player has no BENDOMINOES left to play : he wins a round  
• Or the stock is empty

and players cannot play any pieces : the player who has the lowest point total wins the round (The point total is the total number of dots on your remaining Bendominoes

### VARIATIONS

#### NO DRAW - BY TEAM

In this version, we have 2 Teams of 2 players . Each player draws 7 pieces at the start of the game, So there is no stock. Players take turns and only use their individual pieces. A team wins a round when one team member is declared the winner (see basic rules). The winning team scores the dot points from the remaining Bendominoes of the losing team.

#### MULTIPLE ROUND

The winner of the round note total point of the opponents bendominoes. The first player who has 100 points wins the game.
